PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant(s): Kuo-Yang Sun
5 Chia-Ming Yang
Application No.: 10/711,794
Filing Date: 10/06/2004
Examiner: Mandala, Victor A
Art Unit: 2826
10 Docket No.: OSEP0009USA

Title: PACKAGE STRUCTURE

To: Commissioner for Patents
15 P.O. BOX 1450
Alexandria, VA 22313-1450

Subject: Information disclosure statement under 37 CFR §1.56

20 Dear Sir,

This is an Information Disclosure Statement in accordance with the duty to disclose information material to patentability under 37 CFR §1.56. The applicant wishes to make of record the documents listed on the accompanying form PTO/SB/08.

25

Since this IDS is filed after the mailing date of the first Office action but before final Office action, consideration of the information disclosure statement is hereby requested according to 37 CFR §1.97(c).

That each item of information contained in the information disclosure statement was
30 first cited in an Office communication mailed on October 20, 2005 for the counterpart Taiwan patent application number 093119793, which are no more than three months prior to the filing of the information disclosure statement.

According to the requirement set forth in 37 C.F.R. §1.98 and M.P.E.P. 609, the applicants are submitting an English language abstract of the cited Taiwanese patent TW 456,015 (published Sept 21, 2001). The English language title and abstract of
5 TW 456,015 are listed as follows:

Title: Package with passive components integrated with lead frame

Abstract:

10

The object of the present invention is to provide a package with passive components integrated with the lead frame in order to reduce the occupied area by the PCB and reduce the conductive paths, and provide a semiconductor package with increased electrical characteristics. The features are: in the appropriate locations at
15 the periphery of the die pad for the die, configuring conductive protrusions outward from the die pad and making the protrusions and the die pad have the same potential; using the protrusions and the leads of the lead frame to form opposed electrical contact; and, the positive pole and the negative pole of the passive components are across between the protrusion and the corresponding leads of the lead frame to form
20 the electric connections.

According to the requirement set forth in 37 C.F.R. §1.98 and M.P.E.P. 609, the applicants are submitting an English language abstract of the cited Taiwanese patent
25 TW 567,598 (published Dec 21, 2003). The English language title and abstract of TW 567,598 are listed as follows:

Title: Flip chip semiconductor package

30 Abstract:

A flip chip semiconductor package mainly comprises a semiconductor chip and a

lead frame having a die pad and a plurality of leads. The semiconductor chip has an active surface and a plurality of pads formed thereon. A plurality of bumps are formed on the pads and electrically connected with the leads and the die pad in order to prevent the die from shifting and provide another path for thermal dissipation and transmitting ground signals. Similarly, the bumps also can connect with the leads and tie bars in order to affix the die onto the lead frame more firmly.

It is respectfully requested that the examiner can consider the document(s) listed on the accompanying form PTO/SB/08 and that it be made of record in the application. The applicants sincerely hope that the examiner initials the cited reference(s) on the form and that a copy of the initialed form be sent to the applicants with the next communication from the examiner.

15

Respectfully submitted,

Date: December 30, 2005

Winston Hsu, Patent Agent No. 41,526
P.O. BOX 506, Merrifield, VA 22116, U.S.A.
Voice Mail: 302-729-1562
Facsimile: 806-498-6673
e-mail : winstonhsu@naipo.com

25

Note: Please leave a message in my voice mail if you need to talk to me. (The time in D.C. is 13 hours behind the Taiwan time, i.e. 9 AM in D.C. = 10 PM in Taiwan.)
